

# Agenda

The Global Language of Business

#	Topic	Description	Timing
0	Introduction	Welcome Purpose Introductions Practical information Expectations & adjustments of the programme	9.00 – 9.15
1	Intro to eCom	What is eCom and EDI at GS1 Current priorities	9.15 – 10.30
		Coffee break	10.30 – 11.00
2	Order to Cash	The O2C process Benefits Implementation aspects Experiences & use cases	11.00 – 12.20
3	Closing session	Conclusions Q&A	12.20 – 12.30

# Objectives

The Global Language of Business

- A non-technical workshop on a technical matter
- If I am too technical ...
- If I am not enough technical ...
- Please do not hesitate to ask

# GS1: Who are we?

The Global Language of Business

**GS1** is a not-for-profit standards organisation

**38** years of experience

**112** member organisations representing **all points** in the supply chain

Over a **million** companies doing business across **145** countries

Over **20** represented sectors (FMCG, healthcare, transport, defence...)

 Countries with GS1 Member Organisations

 Countries served on a direct basis from  
GS1 Global Office (Brussels)

# What is GS1 eCom?

The Global Language of Business

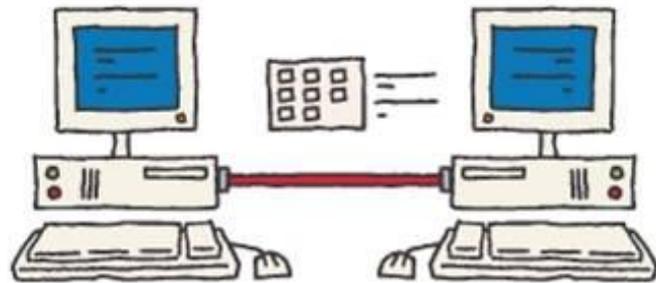

- GS1 eCom stands for **standards in electronic business messaging**
- GS1 eCom is the GS1 term for Electronic Data Interchange (EDI)

# What is electronic business messaging?

The Global Language of Business

- EDI is an acronym for **Electronic Data Interchange**, it can be defined as:
- The interchange of **structured data** according to agreed **message standards**, by **electronic means** with **minimum human intervention**

# GS1 standards portfolio

The Global Language of Business

- GS1 has a portfolio of products improving the supply chain

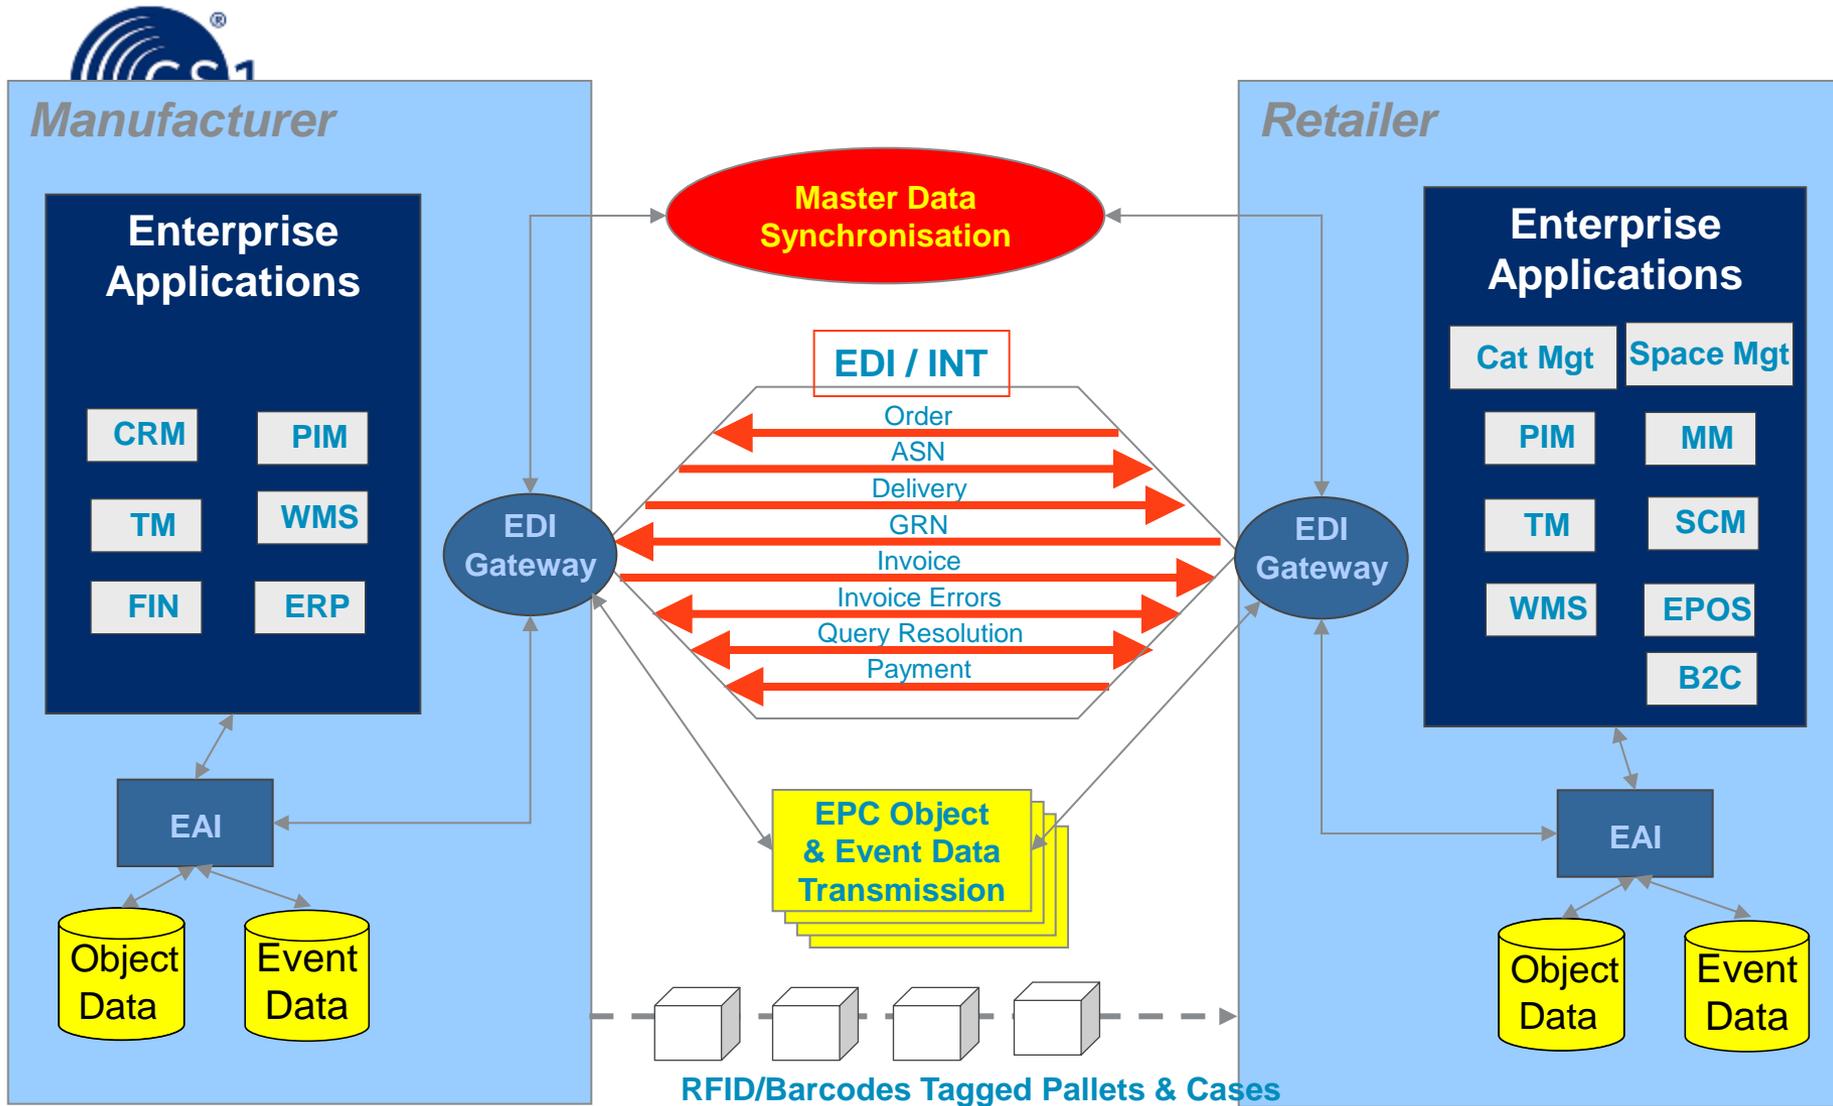

**Global standards for automatic identification**  
Rapid and accurate item, asset or location identification

**Global standards for electronic business messaging**  
Rapid, efficient & accurate business data exchange

**The environment for global data synchronisation**  
Standardised, reliable data for effective business transactions

**Global standards for RFID-based identification**  
More accurate, immediate and cost effective visibility of information

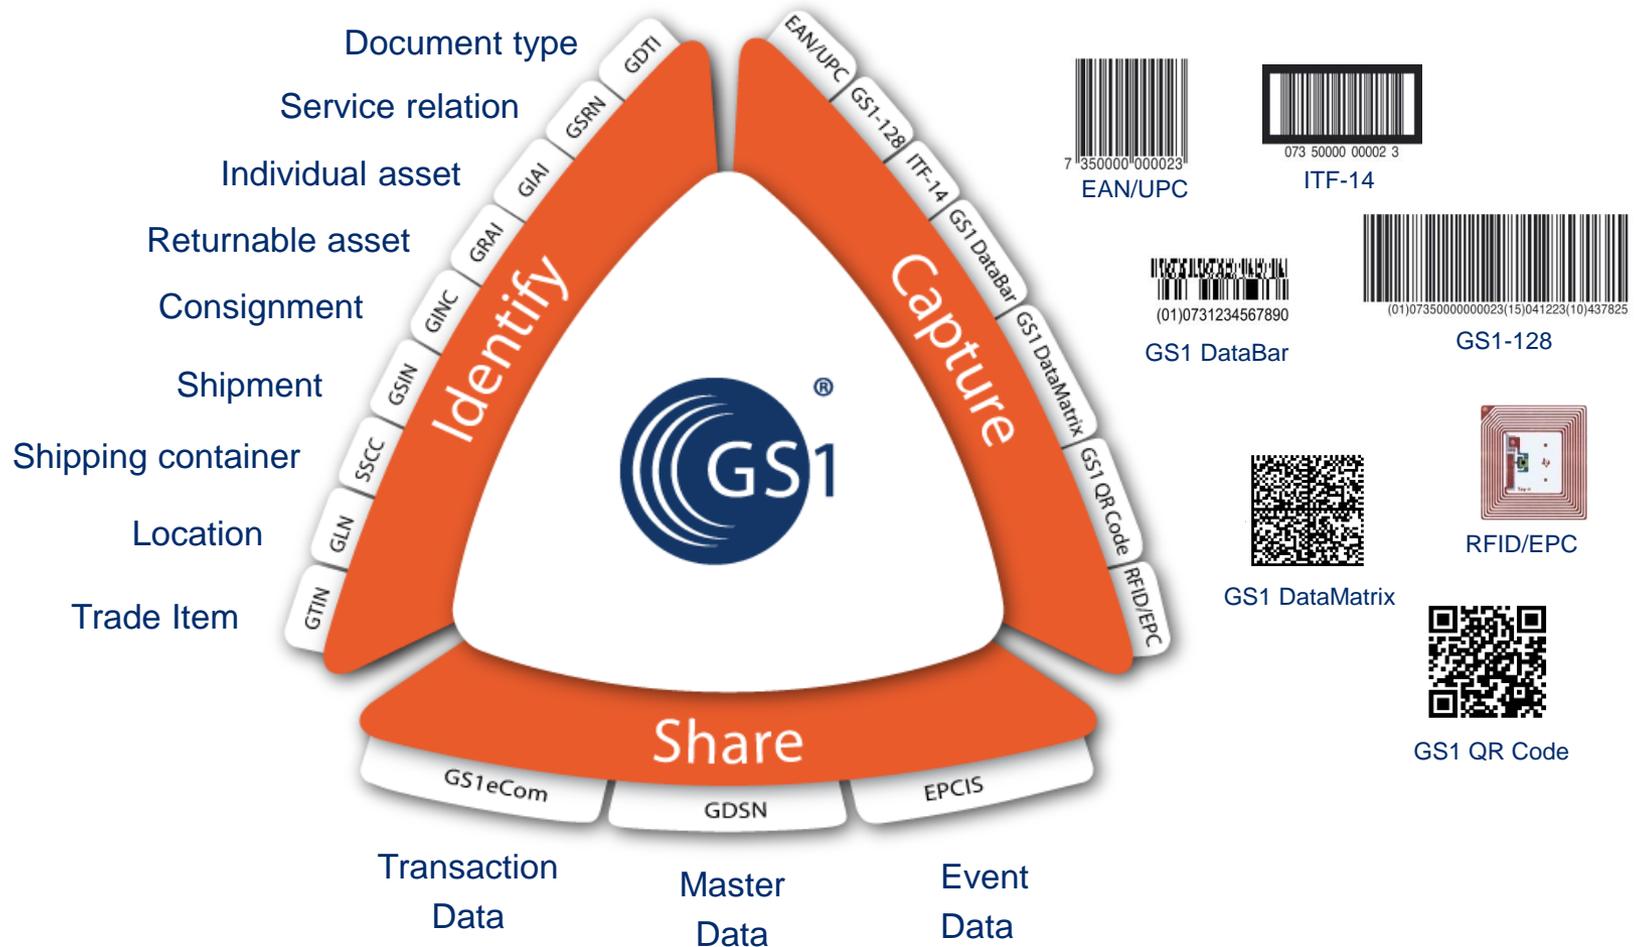

# Supply chain visibility according to GS1

# The GS1 System

The Global Language of Business

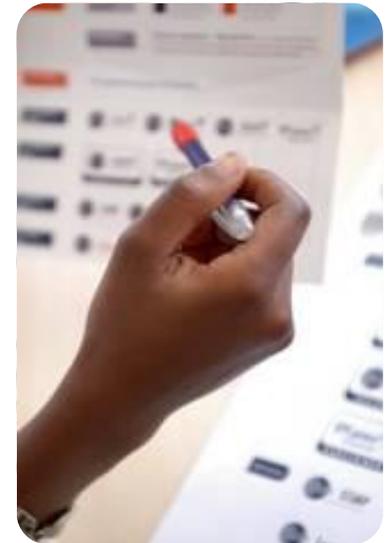

# GS1 eCom standards

The Global Language of Business

- GS1 has three complementary eCom standards
  - **GS1 EANCOM®**
  - **GS1 XML**
  - **GS1 Profiles of UN/CEFACT XML**

# GS1 EANCOM®

The Global Language of Business

- EANCOM® is a GS1 standard for classic EDI, a simplified subset of UN/EDIFACT
- EANCOM® retains only the message elements relevant for GS1 users
- EANCOM® includes GS1 identification keys, allowing integration of physical goods flow with information sent electronically
- EANCOM® messages are an equivalent of paper business documents
- EANCOM® is used by more than 100,000 companies worldwide

# GS1 EANCOM<sup>®</sup> example

---

Order number 128576

---

Message date 30 May 2008

---

Instruction to pay in Bank Account

---

Group conditions apply to the entire ORDER

---

Order based on contract number 652744

---

Contract date 25 April 2008

---

Buyer is identified by GLN 5412345000013

---

Supplier is identified by GLN 5712345001110

---

Order curr. = Pound; invoice curr. = Euro, exchange rate = 1.3

---

Period of the exchange rate date: 1 May 2008 – 30 May 2008

---

Use a truck as the main carriage transport for delivery

---

Terms of delivery are to be Cost, Insurance and Freight

---

First product order is identified by the GTIN 5712345001110

---

Ordered quantity is 48 units

---

# GS1 XML

The Global Language of Business

- XML has been designed for information exchange over the internet
- GS1 eCom uses XML for electronic exchange of business messages
- GS1 provides a set of XML Schemas that describe the structure and content of business documents
- GS1 XML contain business information for a specific scenario that do not always reflect the paper business documents

# GS1 XML example

The Global Language of Business

```
<order:order creationDateTime="2003-11-03T11:00:00.000" documentStatus="ORIGINAL">

  </orderLogisticalInformation>
</order:order>
```

# What does GS1 standardise in eCom?

The Global Language of Business

- The GS1 standards provide the common language used in eCom
  - **Structured data** – e.g. ordered quantity, price, delivery address
  - **Business terms definitions** and their mapping to message components
  - **Message standards** – GS1 EANCOM<sup>®</sup> and GS1 XML
  - GS1 eCom messages are developed using the **commonly accepted syntax** (UN/EDIFACT and XML)
- Guidelines on other, related standard, e.g. Internet protocols
- All GS1 standards & guidelines are developed together with the user communities

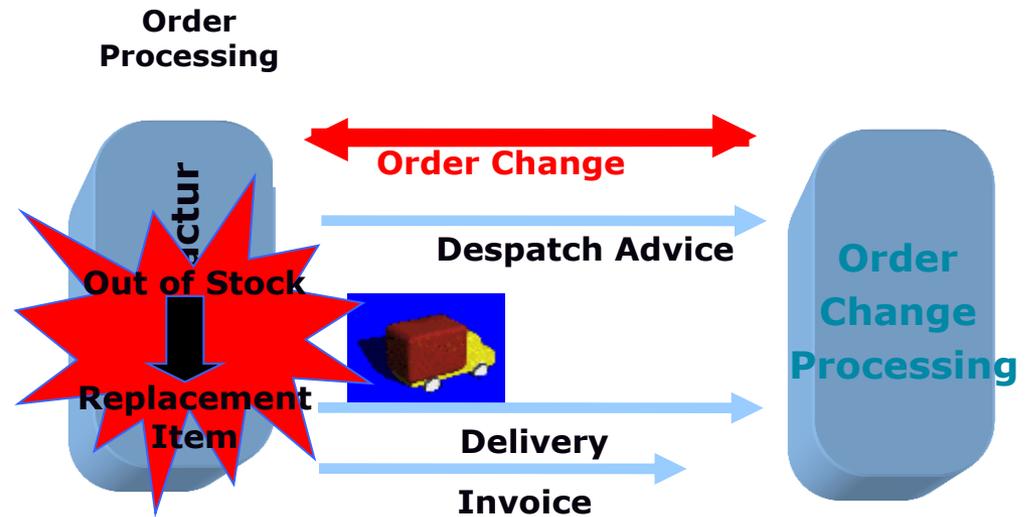

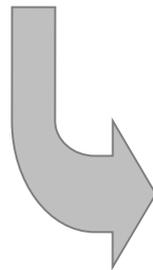

# Electronic Exchange Scenario

Order Processing

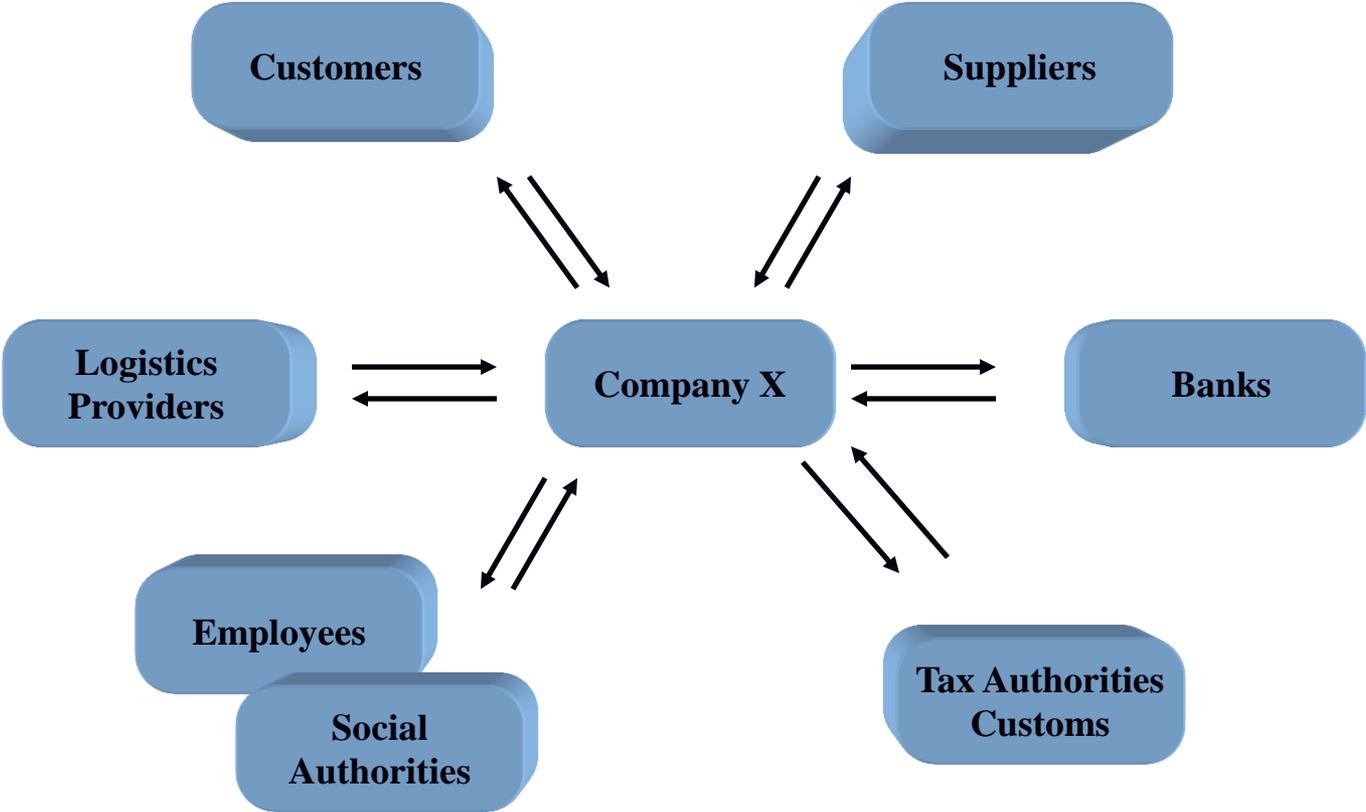

The Global Language of Business

# Electronic Exchange Domains

The Global Language of Business

# General trends in the eCom world

The Global Language of Business

- Shift from message standards to process standards
  - Logistics Interoperability Model (LIM)
  - Upstream standards (UIM, GUSI)
  - Food services
  - Collaborative Product Design
  - Trading Partner Performance Management
- Supply Chain Management is changing
  - RFID technology (EPC)
  - Food safety
  - Waste management
- Increased involvement from authorities – directly or indirectly
  - eInvoicing
  - Trade facilitation – example WTO in China
  - Risk management

# Main Strategies

The Global Language of Business

## ***1. Decoupling technology and business content***

- ***Interoperability***

## ***2. Increased implementation support***

- ***SME***
- ***Developing countries***

## ***3. Increase value add for installed base***

- ***Cost effective improvements***

**eCom Trade Messages**

- **Align**
  - Item Data Notification
- **Order**
  - Order
  - Order Response
  - Configure to Order
- **Deliver**
  - Despatch Advice
  - Receiving Advice
  - Consumption Report
  - Inventory Report
  - Despatch Advice - Meat Product Extension
- **Pay**
  - Invoice
  - Settlement
  - Debit Credit Advice
  - Advanced Remittance Notification
  - Request for Payment
  - Buyer Reconciliation of Request for Paymer
  - Claims Notification

# eCom implementation trends

The Global Language of Business

## GS1 eCom adoption 2005 - 2014

# GS1 Identification Keys and Logistic Labels

# What is the SSCC?

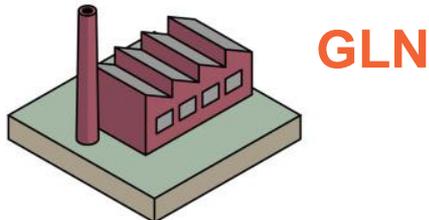

The Global Language of Business

## GS1 identification keys

Global Trade Item Number

Global Location Number

Serial Shipping Container Code

Global Returnable Asset Identifier

**What is the SSCC?**

The SSCC is an 18 digit number used to uniquely identify a **logistic unit**.

<b>Extension digit</b>	<b>GS1company prefix</b>	<b>Serial reference</b>	<b>Check digit</b>
X	54MMMMM	XXXXXXXXXX	C
X	54MMMMMM	XXXXXXXXX	C
X	54MMMMMMM	XXXXXXX	C

## Uniquely identifying logistic units

- Definition :

A **logistic unit** is an item of any composition established **for transport and/or storage** which needs to be managed throughout the supply chain.

- Identification key:

**SSCC** (Serial Shipping Container Code)

*What is the SSCC?*

## Who allocates the SSCC?

The **creator of the logistic unit** allocates the SSCC (e.g. the party who palletizes). This can be the:

- Manufacturer
- Wholesaler
- Logistic provider
- Retailer

## Why a GS1 logistic label?

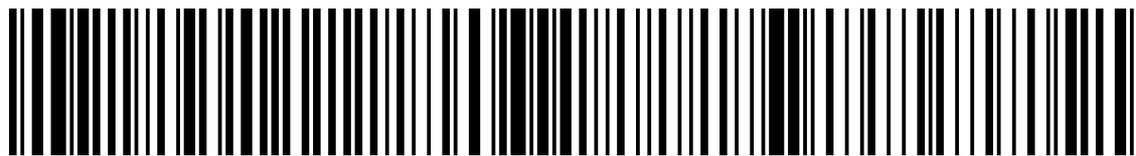

- Unique identification and traceability of the logistic unit
- Data transmission :
  - on the logistic label
  - preferably in combination with the EDI despatch advice
- Standardised logistic label, everyone knows exactly where to find all information.

## Logistic label and GS1 Application Identifier (AI)

The Global Language of Business

(02)03451230000006(37)56(15)030303(10)ABCDEF

✓ **Application Identifier (AI)**, is a 2, 3, or 4 digit numeric prefix in front of the data to tell what the data means.

For example, the AI for CONTENT is (02), COUNT is (37), BEST BEFORE is (15) and LOT is (10).

✓ **Data** - AI's contain either fixed or variable length data. Their structure is either predefined or free.

Example: Batch/Lot = variable length data with a maximum of 20 alphanumeric characters. Its structure is free.

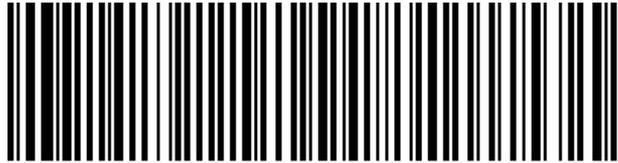

# Structure of the GS1 logistic label

The Global Language of Business

Top section : free text

Middle section: human readable interpretation of the barcoded data

Below : GS1-128 barcode; SSCC always in the lowest barcode (mandatory)

<b>From :</b> EAN Belgilux Rue Royale 29 1000 Bruxelles	<b>To :</b> EAN International Rue Royale 145 1000 Bruxelles
<b>Produit XYZ</b>	
<b>SSCC :</b> 054100001234567897	
<b>CONTENT :</b> 15410000543216	
<b>COUNT :</b> 20	
<b>BEST BEFORE :</b> 31 December 2003	
 ( 02 ) 15410000543216 ( 15 ) 031231 ( 37 ) 20	
 ( 00 ) 054100001234567897	

# eCom benefits

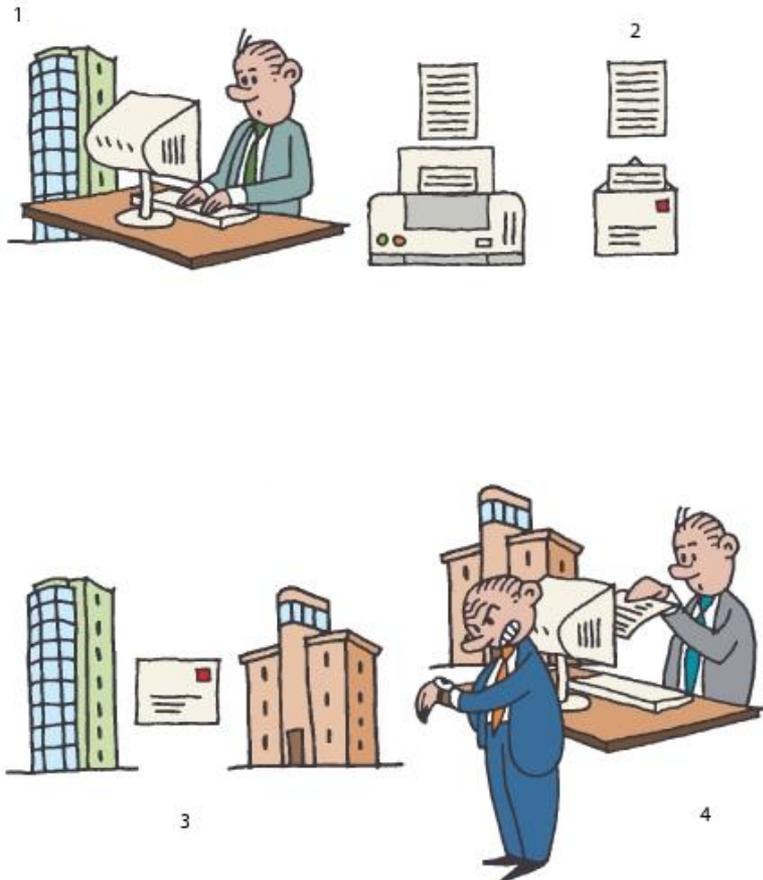

# Why use eCom instead of paper?

The Global Language of Business

- The traditional paper-based document exchange:
  - Is time consuming
  - Is error-prone
  - Involves a lot of resources

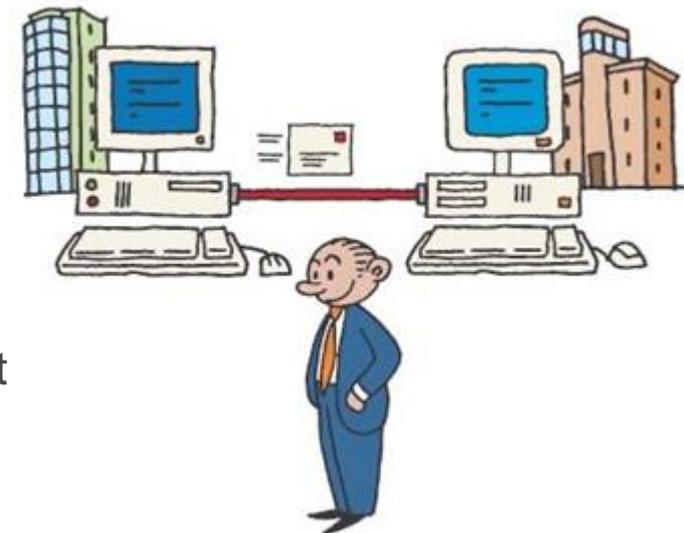

# Why use eCom instead of paper?

The Global Language of Business

- The electronic document exchange, in which two or more computers communicate directly:
  - Takes much less time
  - Business data are instantly available (no re-keying)
  - Reduces errors as no human intervention is needed
  - Requires little resources when in operational stage
  - Eliminates paper processing and cost of:
    - Printing
    - Posting
    - Manual data keying
    - Archiving of paper
    - Waste of trees and therefore save environment
  - **Enables new business processes**

# Benefits examples – GS1 standards

The Global Language of Business

- From Global Scorecard Consumer Goods Forum & IBM
  - 4,400 Key Performance Indicator Scorecards submitted by consumer product companies
  - showed the following relationships between the usage of the GS1 standards and business results:
    - 5.2% points savings of distribution costs
    - 1.5% points increased invoice accuracy
    - 5.9% points increased fill rates (percent of orders shipped within order due date - when requested)
    - 61 hours reduced lead time (from the moment the customer places an order to the moment it is received by the customer)
    - 5.8% points reduced out-of-stocks rate

# Effects of eCom and SSCC implementation

The Global Language of Business

- From Global Scorecard Consumer Goods Forum & IBM

## Competitive advantage

Efficiency	Customer Satisfaction	Improved Quality	Sustainability
<ul style="list-style-type: none"><li>• Time saving</li><li>• Cost reduction</li><li>• Improved supply chain operations</li><li>• Improved visibility</li><li>• Increased understanding of retailers needs - become preferred collaboration partner</li><li>• Increased sales</li></ul>	<ul style="list-style-type: none"><li>• Improved client relationship</li><li>• Improved customer satisfaction</li><li>• Better information availability</li></ul>	<ul style="list-style-type: none"><li>• Improved data quality</li><li>• Fewer invoice-disputes</li></ul>	<ul style="list-style-type: none"><li>• Improved Image &amp; Brand</li><li>• Less Waste</li><li>• Optimized usage of resources</li><li>• Better overview of inventory</li></ul>

## Improvements through implementation

- **Store Service Level ↑**
  - SSCC
  - EDI for orders
  - EDI despatch advice

- **Out of stocks ↓**
  - SSCC
  - EDI for orders
  - EDI for despatch advice

- **Invoice accuracy ↑**
  - EDI for invoices (manufacturers)

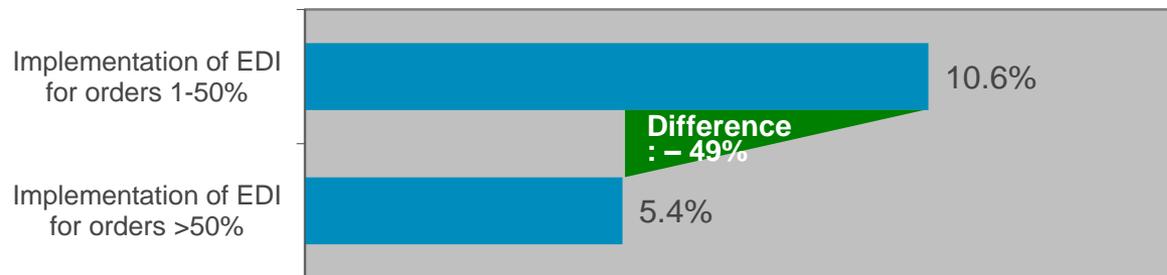

# Global Scorecard – Order

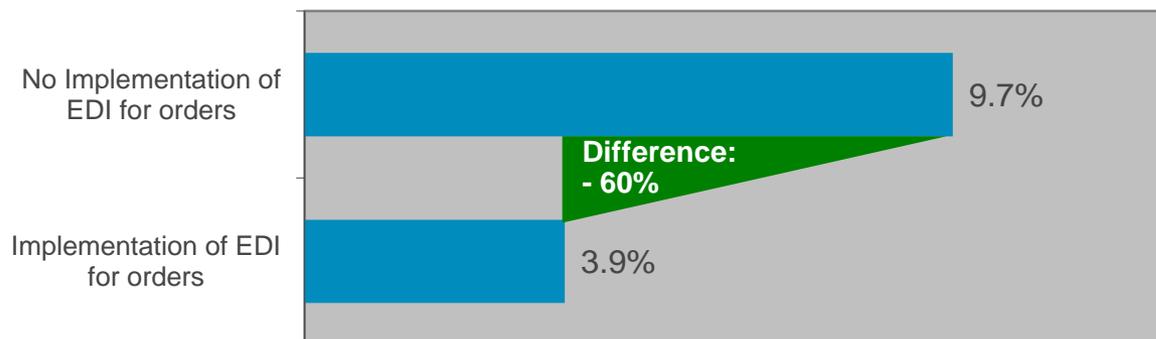

The Global Language of Business

- Global Scorecard Consumer Goods Forum & IBM

## Distribution costs with the use of EDI for orders

## On-Shelf/POS Out-of-Stocks with the use of EDI for orders

# Cost saving examples – Order

The Global Language of Business

- **Order message**
  - **18 € savings** for each transaction in France
  - **12 € savings** for each transaction in Germany
- **Some cost items taken into account in France**
  - Generating and mailing paper order (1.5 €) vs. generating and sending electronic order (0.01 €)
  - Cost of manual entering the paper order into ERP system (1.4 €) vs. electronic order (0 €)
  - Cost of handling disputes for paper order (4 €) vs. EDI order (3 €)
  - Number of ordering errors is 25% lower with EDI

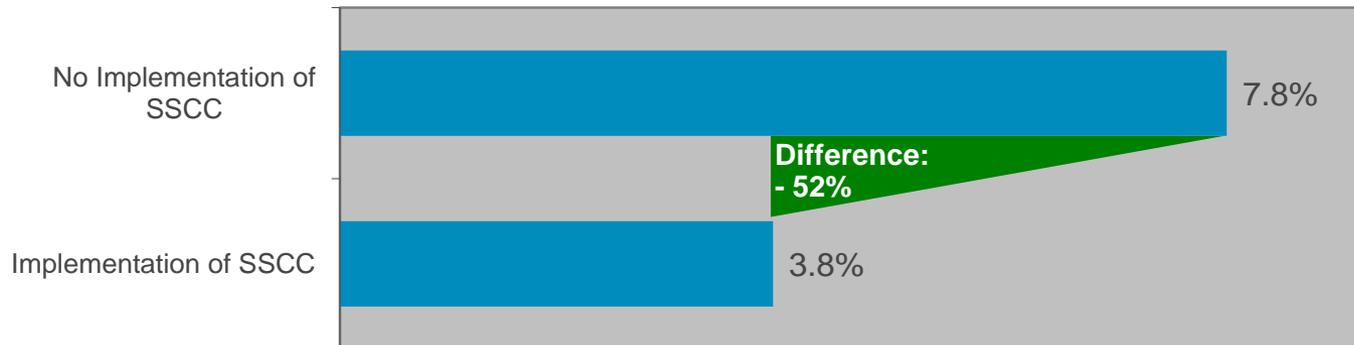

# Global Scorecard – SSCC

The Global Language of Business

- Global Scorecard Consumer Goods Forum & IBM

## On-Shelf/POS Out-of-Stocks with the use of SSCC

# Cost saving examples – Despatch Advice + GS1 Logistic Label

The Global Language of Business

- **Despatch Advice message + GS1 Logistics Label**
  - **12 € savings** for each transaction in France
  - **15 € savings** for each transaction in Germany
  - **5 \$ savings** in USA when Despatch Advice is used for simple confirmation purposes to as much as **50 \$** when used for visibility and automated receiving
- **Some cost items taken into account in France**
  - Number of disputes per day without GS1 standards (4) vs. with GS1 standards (2)
  - Number of ordering errors is 50% lower with EDI
  - 30 minutes saved on reception per truck with GS1 standards

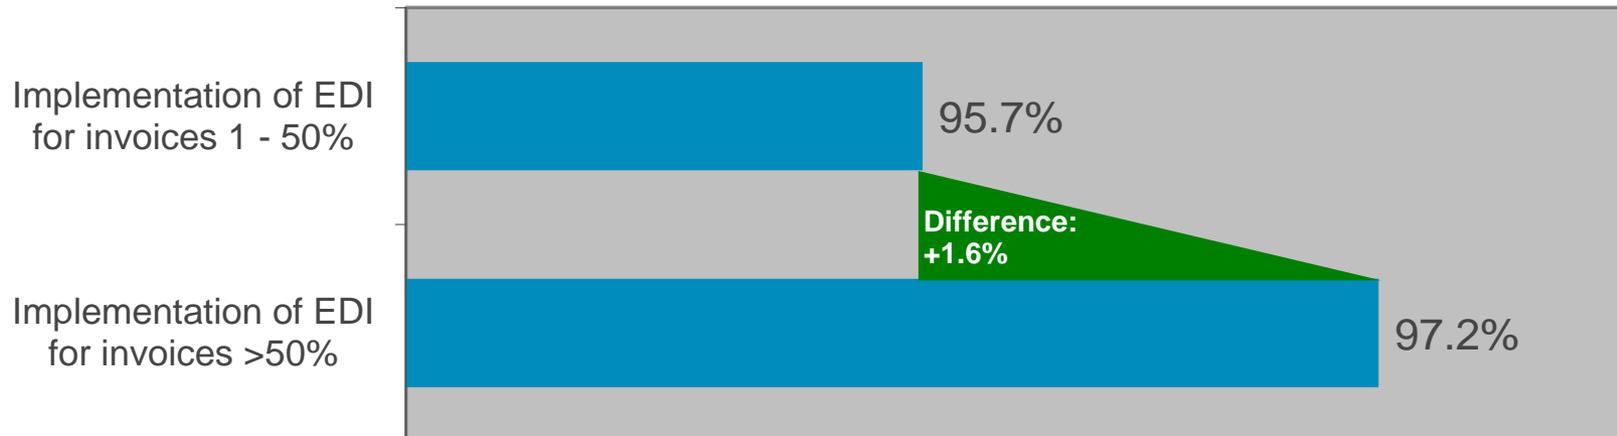

# Global Scorecard – Invoice

The Global Language of Business

- Global Scorecard Consumer Goods Forum & IBM

## Invoice accuracy for manufacturers using EDI for invoices

# eInvoicing in Spain

The Global Language of Business

## e-Invoicing in Spain

---

- Currently over 5,600 companies use e-Invoice in Spain
- Monthly 2.5 million invoices are sent electronically
- Main savings:
  - Supplier: 1 €/invoice
  - Retailer: 2.8 €/invoice
  - Annual cost saving for entire sector: 76 million €/year
  - 10 km of paper storing space
  - Over 10,000 trees saved
